FY2010-FY2014 Total Amounts Fined and Revenues Collected

The following line graph demonstrates an overall increase in total amounts fined compared to the total revenues collected from enforcement cases between FY2010 and FY2014. Due to the lag time between issuing fines and collecting them, discrepancies between the two lines can appear large. A number of factors can influence spikes and dips. For example, a new Civil Infractions: Schedule of Fines took effect in August 2014, doubling the amounts fined for several environmental programs.
