

Make EV Charging More Affordable for Multifamily Properties

**Rebates and free technical assistance for
EV charging installations at multifamily
buildings across Washington, DC**

The DC Multifamily EV Charging Assistance Program helps multifamily properties install Level 1 and Level 2 electric vehicle charging. Our goal is to make installing EV charging easier and more affordable—especially in equity-priority areas and charging deserts.

Rebates

Cash payments that reimburse a portion of project costs.

Free technical assistance

Guidance to make installing EV charging easier and more affordable.

Priority where it matters

Support for multifamily buildings in equity-priority areas and charging deserts.

Up to 60%

Rebate for resident-only charging projects

Up to 80%

Rebate for publicly accessible charging projects

4+ Ports

Minimum charging ports per project

\$200,000

Maximum rebate per site

Administered by Catalyst Mobility and the District
Department of Energy & Environment
