Subject: Capitol Power Plant Proposed Air Quality Permits

Dear Mr. Ours:

As a Hill resident and father, I want to express my concern regarding the Capitol Power Plant proposed air quality permits. While I am not a scientist and do not pretend to understand everything I read on the website, I do understand and find extremely concerning the following passage:

"While the installation of the combustion turbines and related equipment will likely result in increased emissions from the facility"

Washington, DC's air quality is already rated very poor, with "unhealthy levels of air pollution" by numerous organizations, and recently received a grade of "F" from the American Lung Association. Any changes to current permitting should be to improve our air quality not worsen it. The federal government should be doing more to be better neighbors with the community. Our children deserve at least this.

Thank you for considering my opinion.

Regards,
Howard Pressman
