

GOVERNMENT OF THE DISTRICT OF COLUMBIA
Department of Energy and Environment

**APPLICATION FOR PERMIT TO CONSTRUCT/OPERATE
A BOILER OR OTHER EXTERNAL COMBUSTION EQUIPMENT**

Before completing this application: Be advised that in most cases fuel burning equipment having a capacity of five million (5,000,000) or fewer BTUs per hour of heat input and which uses for fuel only gaseous fuels or distillate oils does not require a permit, provided the source does not trigger major source Non-attainment New Source Review (NNSR). If this is your situation, you need not complete this application. However if you are installing multiple units and/or other types of units as part of a project, you are advised to calculate the facility-wide emissions to ensure NNSR is not triggered. If you need assistance, please call (202) 535-1747 for more information.

I. Facility and Applicant Information

1. _____
Full Legal Name of Applicant/Organization

2. _____
Type of Organization

3. _____
Name of Owner(s) or Principal Partner(s) of Above Organization

4. _____
Mailing Address of Applicant (No., Street, City, State, Zip)

5. _____
Street Address of Facility (if different from Mailing Address)

6. Owner/Responsible Official Name: _____
Owner/Responsible Official Title: _____
Phone No. _____ E-mail: _____

7. Contact Person: _____
Contact Person Title: _____
Phone No. _____ E-mail: _____

8. Type of Project: New Construction Renewal

 Initial Permitting of Existing Source Change Owner/Transfer of Existing Permit
Note that replacement of an existing source is considered "New Construction".

Application for Permit to Construct/Operate a Boiler or Other External Combustion Equipment

Page 2

9. For renewal or transfer, provide the existing permit number and expiration date:

10. Describe the facility at which this equipment will be located:

11. Primary industrial codes for the major activity at this location :

SIC: _____ NAICS: _____

II. General Equipment Information

1. Equipment Name/Identification: _____

2. Manufacturing Information:

Boiler Order Date

Boiler Manufacture Date
(if available)

Boiler Model Number

Boiler Serial Number
(if available)

3. Primary fuel burned in this unit: *Check one:*

Natural Gas LPG Diesel Fuel No. 2 Fuel Oil Other _____

Heat input rating on primary fuel (MMBTU/hr): _____

Rated fuel consumption rate (per hour): _____ *Specify units*

Maximum quantity/year: _____ *Specify units*

4. Secondary fuel burned in this unit (if applicable): *Check one:*

Natural Gas LPG Diesel Fuel No. 2 Fuel Oil Other _____

Heat input rating on secondary fuel (MMBTU/hr): _____

Rated fuel consumption rate (per hour): _____ *Specify units*

Maximum quantity/year: _____ *Specify units*

Application for Permit to Construct/Operate a Boiler or Other External Combustion Equipment

Page 3

Is the applicant requesting a limitation on the operation of the unit on secondary fuel to only be used in cases of primary gaseous fuel interruption/curtailment plus up to 48 hours per calendar year for periodic testing, maintenance, or operator training on liquid fuel to avoid applicability of 40 CFR 63, Subpart JJJJJJ or to limit applicability of 40 CFR 63, Subpart DDDDDD? Yes No

5. Does the unit simultaneously fire multiple fuels? Yes No

6. Fuel oil properties, if applicable:

Maximum Sulfur Content (%): _____ Heat Content (BTU/fuel unit): _____

7. Type of oil burner, if applicable

Steam atomization Air atomization Pressure or Gun type

Other _____

8. Boiler type: Fire tube Water tube Other _____

9. Furnace volume (ft³): _____

10. Describe any gas cleaning or emission control device(s) on this unit (attach specifications as appropriate):

11. Estimated efficiency of control device (if applicable): _____ % for _____ (pollutant)

12. Stack height above ground: _____ ft Inner diameter at exit: _____ ft

Exit gas volumetric rate: _____ cfm Gas temperature at exit: _____ °F

Distance of stack from nearest property boundary: _____ ft

Exit gas velocity: _____ ft/s Exit gas moisture content: _____ %

Exit gas volume through stack: _____ acfm

Describe the location and surroundings of the stack outlet:

13. Date construction/installation of unit began or is planned to begin: _____

14. Date construction/installation of unit completed (if applicable): _____

Application for Permit to Construct/Operate a Boiler or Other External Combustion Equipment

III. Emissions

- Please complete the following “Potential to Emit” table (except as noted below):

Note: It is acceptable to provide calculations in an alternate format as an attachment to this application. Please ensure that any submittal provides sufficient information to allow the application reviewer to reproduce the calculations from the source material. Please also ensure that any alternative submittal provides substantially the same information requested in the following table.

If potential emissions are provided in an attachment, please check the following box:

Table: Potential to Emit¹						
Pollutant	Emission Factor²	Units of Emission Factor³	Emission Rate (lb/hr)	Maximum Uncontrolled Emissions (Ton/yr)	Emission Control Efficiency⁴ (%)	Maximum Controlled Potential Emissions (Ton/yr)⁵
NO_x						
SO_x						
VOC						
CO						
PM Total⁶						
PM10 (if necessary)⁷						

¹ “Potential to Emit” is the maximum capacity of a stationary source to emit a pollutant under its physical and operational design. Any physical or operational limitation on the capacity of the source to emit a pollutant, including air pollution control equipment and restrictions on hours of operation or on the type or amount of material combusted, stored, or processed, shall be treated as part of its design only if the limitation or the effect it would have on emissions is enforceable as a practical matter. Secondary emissions do not count in determining the potential to emit of a stationary source. [20 DCMR § 199]

² The emission factor should reflect the maximum emissions expected from the unit when operating properly.

³ Examples of commonly used units are lb/million BTU of heat input, fuel usage rate, and heat content of the fuel.

⁴ If this information is unknown, or no air pollution control equipment is installed, indicate “Not Applicable or N/A”.

⁵ See Section IV.3 of this application for additional requirements if these values exceed certain regulatory thresholds.

⁶ PM Total includes both filterable and condensable particulate matter fractions.

⁷ PM10 (filterable plus condensable) only needs to be reported on this form if PM total maximum controlled potential emissions equals or exceeds 5 tons per year.

Cite the source(s) and Basis of the emission factors and on a separate page include sample calculations:

Application for Permit to Construct/Operate a Boiler or Other External Combustion Equipment

Page 5

- Emergency Episode Procedures: How do you intend to comply with the requirements for reduced emissions during an air pollution episode (see 20 DCMR §401)?

Alert: _____

Warning: _____

Emergency: _____

- Are you requesting any additional special operating limitations, such as limits on your potential to emit? Yes No If so, please describe:

IV. Notes and Required Attachments

- Please attach a printed copy of any spreadsheet of calculations used in this application. The assigned permit writer may require submittal of the electronic version of the spreadsheet to review calculations.
- Please attach a copy of the manufacturer’s specifications for the unit and any other appropriate supporting documentation, including the basis for manufacturer-specified emission factors.
- If “Maximum Controlled Potential Emissions” in the table in Condition III.1 equals or exceeds the following thresholds (without netting), take the actions specified:

Pollutant	Threshold (tons/year)	Action
CO	100	Prepare an applicability analysis pursuant to 20 DCMR §204 and, where applicable, a plan to comply.
NO _x	25	
VOC	25	
SO ₂	40	
PM10	15	
PM2.5	10	
Any other pollutant and associated threshold specified in the definition of “significant” in 20 DCMR §299		
VOC	5	
NO _x		
SO ₂		
PM10		
PM2.5		
Aggregate of HAPS listed in §112 of the Clean Air Act

4. AQD may require submission of additional information beyond what is requested on this form if needed to evaluate regulatory applicability. If you are aware of complex regulatory issues related to this project, AQD recommends that you proactively attach a regulatory review document to explain your understanding of the applicability of any relevant regulations. This is likely to simplify and thereby hasten review of the application.
5. Deviations from submitted plans and specifications are not permissible without securing formal approval from AQD via an application update request and re-approval, if already approved.
6. Please attach a copy of a recent "Certificate of Clean Hands" which can be obtained from mytax.dc.gov.
7. The complete application and applicable supporting documentation must be submitted to the following address:

Branch Chief, Air Quality Permitting Branch
Department of Energy and Environment
1200 First Street NE, 5th Floor
Washington DC 20002

V. Applicant Certification:

I hereby certify, under penalty of D.C. Official Code § 8-101.05e, that I am authorized to submit this application on behalf of the applicant and that the statements contained herein are true and correct to the best of my knowledge. I further certify that all attached information and previously submitted information referenced in this application remains true, correct, and current, to the best of my knowledge.
