INTRODUCTION

The Department of Energy and Environment's (DOEE) Clean and Affordable Energy Act and Renewable Energy Portfolio Standard Act Quarterly Report to the Council of the District of Columbia (Council) covers the period from October 1, 2018 – December 31, 2018.

This report: 1) describes significant program status; 2) provides timelines and milestones to track the progress and success of each program; 3) offers highlights of ward specific data; and 4) presents the status of administrative and programmatic expenditures.

BACKGROUND

The Clean and Affordable Energy Act of 2008 (CAEA), effective October 22, 2008 (D.C. Law 17-250; D.C. Official Code § 8-1773.01 *et seq.*), established the Sustainable Energy Trust Fund (SETF) and the Energy Assistance Trust Fund (EATF), which are funded by assessments on the natural gas and electric companies. The SETF finances the District of Columbia Sustainable Energy Utility (DCSEU), and the EATF provides annual support for the Low-Income Home Energy Assistance Program.

Additionally, the Renewable Energy Portfolio Standard Act of 2004 (REPS), effective April 12, 2005 (D.C. Law 15-340; D.C. Official Code § 34-1431 *et seq.*), established the Renewable Energy Development Fund (REDF), which is funded by compliance fees paid by electricity suppliers under the District's Renewable Energy Portfolio Standard for the purpose of funding eligible solar projects in the District.

Pursuant to sections 210(e) and 211(e) of the CAEA and section 8(f) of the REPS, DOEE is required to submit a quarterly report detailing EATF, SETF, and REDF expenditures and program performance.

Sustainable Energy Trust Fund

The DCSEU submits quarterly reports to DOEE, and DOEE files these reports with the Council on behalf of the DCSEU. These reports include programs funded by the SETF. Both DOEE's and DCSEU's reports can be found on DOEE's website.

Energy Assistance Trust Fund

Low-Income Home Energy Assistance Program Background

DOEE administers the Low Income Home Energy Assistance Program (LIHEAP), which assists low-income households in the District, particularly those with the lowest incomes that pay a high proportion of household income for home energy, primarily in meeting their immediate home heating and cooling needs. LIHEAP benefits are provided for households using electric, natural gas, or home heating oil. DOEE provides energy assistance benefit payments to income qualified households by providing a direct credit, on behalf of the customer, to the respective utility company that provides service to the household.

LIHEAP is funded by three sources – US Department of Health and Human Services (US HHS), District General Funds, and the Energy Assistance Trust Fund (EATF), a special purpose revenue fund. DOEE applies for an annual formula grant from US HHS through a State Plan, which is submitted by September 1 each year.

Energy assistance benefits are determined through a benefit matrix that is approved by the US HHS. DOEE provides two types of benefits: Regular energy assistance benefits and emergency energy assistance benefits. The regular benefit is a one-time benefit the household may receive each year, and is calculated based on four factors: household size, total household income, heating source, and type of dwelling. Regular energy assistance benefits range from \$250 to \$1,500 and the average benefit payment per household is \$500-\$600. The emergency benefit is available to low-income District residents who have received a disconnection notice for electric or gas service, or are already disconnected. Households that are out of home heating oil are also eligible to receive an emergency benefit.

Program Accomplishments

The total number of LIHEAP benefits provided to District households this quarter from all funding sources, including EATF, was 8,478.

Table 1: LIHEAP Benefit Payments Quarter 1 Timeline and Milestones

Milestone	Goal Date	Actual Date
Quarter 1: October 1, 2018 – December 31, 2018		
Serve additional eligible District households	December 2018	December 2018

Next Quarter's Projected Goals

Table 2: LIHEAP Benefit Payments Quarter 2 Timeline and Milestones

Milestone	Goal Date	Actual Date
Quarter 2: January 1, 2019 – March 31, 2019		
Serve additional eligible District households	March 2019	

Renewable Energy Development Fund

Background

The intent of the Solar for All Program of the REPS is to expand the District's solar capacity, increase the amount of solar generated within the District, and provide the benefits of locally-generated solar energy to low-income households, small businesses, nonprofits, and seniors. Solar for All's specific targets are to provide the benefits of solar energy to 100,000 low-income households (defined as households at or below 80% of Area Median Income) and to reduce their energy bills by 50% (based on the residential rate class average usage for 2016) by 2032.

DOEE is implementing Solar for All in five three-year phases to ensure the program is sufficiently flexible to adapt to market changes and overcome barriers. This phase focuses on researching and developing solutions necessary to complete large-scale projects in subsequent implementation phases. This phase intends to achieve these goals through Solar for All Innovation and Expansion Grants, and strategic external and interagency partnerships.

DOEE awarded nine innovation and expansion grant proposals chosen based on the applicants' ability to meet the baseline eligibility criteria, clear plans for addressing core barriers, and the innovation demonstrated by their proposals. Grantees represent both nonprofit and for-profit entities, and the grantees are also engaging many District-based businesses as teaming partners. Table 3 provides the goals and details of the awarded grants.

Table 3: Solar for All Innovation and Expansion Grants

Grantee	Project Description
DC Solar United Neighbors (SUN), formerly Community Power Network	This grant funds SUN's Low-Income Solar Co-op Program, which will bring low-income residents together in a group or solar co-op, to provide more affordable bulk procurement of solar installations. SUN will pay for the full installation of panels on the homes of low-income residents. Low-income homeowners will receive all the associated financial benefits of solar, at no cost. SUN plans to install 750 kW, serving at least 215 households.
New Partners Community Solar Corp. (formed by Nixon Peabody LLP)	This grant funds Groundswell's installation of solar panels on six houses of worship in Wards 4, 7, and 8, which will result in free, 20-year community solar subscriptions for low-income households. Groundswell will provide local employment and apprenticeship opportunities, and solar jobs skills training. Groundswell plans to install 366 kW, serving up to 122 households. This grant funds New Partners Community Solar Corp.'s installation of solar panels on 15-25 commercial, nonprofit, and apartment rooftops, resulting in free, 25-year community solar subscriptions for low-income households. New Partners Community Solar Corp. plans to install 1.25 MW, serving at least 425 households.
Urban Energy Advisors (DBA Urban Ingenuity) in partnership with NHT Enterprise	This grant funds Urban Energy Advisors' installation of solar energy systems on affordable, multifamily buildings. Urban Energy Advisors plans to install up to 1 MW, serving up to 402 households.
PEER Consultants, P.C.	This grant funds PEER Consultants, P.C.'s installation of solar panels on affordable, multifamily buildings, resulting in 15-years of free solar energy benefits for low-income households. The grantee will also educate building owners on how their rooftops could be used for solar generation and other environmental measures, including stormwater retention and methods for reducing urban heat island effect. PEER Consultants, P.C. plans to install 500 kW, serving

Grantee	Project Description
	100 low-income households.
Neighborhood Solar Equity, LLC	This grant funds Neighborhood Solar Equity, LLC's
(collaboration between Community	installation of solar energy systems on several
Renewable Energy, Root + Branch, and Kelly	buildings at a local university. Electricity will be
Electric)	provided to the university. Solar Renewable Energy
,	Credit (SREC) revenue from the project will benefit
	low-income residents for 15 years. Neighborhood
	Solar Equity, LLC plans to install 595 kW, serving
	up to 100 households.
Open Market ESCO LLC (the energy services	This grant funds Open Market ESCO LLC's
division of WinnCompanies)	installation of solar panels on 4 roofs of Atlantic
_	Terrace, a 195-unit affordable multifamily property
	in Ward 8, providing free, 15-year community solar
	subscriptions for low-income District residents. The
	grantee will also provide education to low-income
	residents regarding the benefits of solar. Open
	Market ESCO LLC installed 548 kW, serving
	approximately 150 income-qualified households.
Ethos Strategic Consulting, LLC	This grant funds Ethos Strategic Consulting, LLC's
	installation of solar canopies over surface parking
	lots at several affordable housing properties. The
	benefits from the electricity generated in this
	community solar project will be provided in the
	form of direct payments to the low-income residents
	of the adjacent properties for 25 years. Ethos
	Strategic Consulting, LLC plans to install 1 MW,
	serving up to 350 households.
Community Preservation and Development	This grant funds CPDC's installation of solar panels
Corporation (CPDC)	on the rooftops of 14 multifamily properties owned
	by CPDC. The proceeds from the electricity
	generated will reduce operating costs for CPDC.
	CPDC will use these cost savings to invest building
	upgrades, new amenities, and resident services that
	benefit the residents of these properties. CPDC
	plans to install 1 MW, serving 4,800 low-income
	households.

In addition to these nine grants, DOEE has fostered partnerships for several projects as shown in Table 4. These projects provide opportunities for DOEE to support existing efforts with private entities and other District agencies through funding training, and providing technical assistance.

Table 4: Solar for All External and Interagency Partnerships

Table 4: Solar for All External and Interagency Pa	-
Partnership	Project Description
Community Solar Pilot	Gap financing to assist with the development and operation of community solar arrays on three properties owned and managed by Brookfield Office Properties, located in downtown DC, serving 100 households with 181kW.
Vulnerability Assessment and Resilience Audit and Solar Tool for Affordable Housing	To develop a tool to assess the vulnerability of the District's affordable housing stock to the impacts of climate change and to identify opportunities to improve resilience, reduce energy use, install solar, and install battery storage systems.
Low-Income Energy Efficiency and Solar- Ready Roof Demonstration	A demonstration project at Garfield Terrace (a DC Housing Authority property) to pair energy efficiency measures with solar, through the federal Weatherization Assistance Program.
DC Sustainable Energy Utility (DCSEU)	The DCSEU planned to install at least 1 MW of solar in FY 2017 across the commercial, government, and institutional sectors. In FY 2018, DOEE hired an independent third party contractor to verify and determine the DCSEU's achievement with respect to the solar/renewable energy performance benchmark in the DCSEU contract.
Solar Works DC (SWDC)	A low-income solar installation and job training program. Solar Works DC will reduce energy costs for qualified low-income District homeowners by installing solar systems on their homes. The program will train more than 200 District residents and will install solar systems on income-qualified homes in the District over three years.
Department of General Service (DGS)	2.6 MW community solar installation in Ward 8 to serve low-income households, and a pilot project to test different energy storage solutions and to procure and install solar, coupled with energy storage.
DC Public Library (DCPL)	DOEE is partnering with DC Public Library for the procurement and installation of a 50 kW solar system, coupled with an energy storage system, at a newly constructed DC Public Library
Department of Housing and Community Development (DHCD)	To deliver technical assistance to recent Housing Production Trust Fund recipients and affordable housing developers seeking gap-financing.
DC Housing Authority (DCHA)	To support roof repair, replacement, solar installation, and battery storage installation at DCHA's housing properties.
University of the District of Columbia (UDC)	DOEE is partnering with UDC to support roof repair/replacement of at least one building's roof and the subsequent installation of solar to benefit low income students.

Program Accomplishments

The **DC Housing Authority (DCHA)** completed the solar panel installations at their Parkway Overlook (717kW) and Ft. Lincoln (118kW) properties. Final approvals from Pepco are pending for these installations. Upon completion, DCHA estimates the total solar energy capacity funded by the grant will be 1.7MW, providing benefits to over 1,000 households.

The **Solar Works DC** 12 week Fall cohort commenced in September and trained 25 District residents in solar installation, with 18 trainees graduating. The team successfully installed 62kW of solar energy on 18 households in Q1FY19. Since its launch in May 2017, the Solar Works DC program has installed 341kWs of rooftop solar arrays on 94 income-qualified single-family homes throughout the District. Additionally, 125 District residents across 5 cohorts have been trained to install rooftop solar arrays, 96 graduated from the program, resulting in gainful employment for 27 District residents in solar-related fields, following their training. The grantee implementing Solar Works DC is required to track program trainees six-month post-program to continue to connect them to industry employers and sustainable work opportunities in this field. The program has become one of the DC Infrastructure Academy's flagship programs and continues to operate there.

Open Market ESCO installed and interconnected 651 kW of solar on Winn Companies' Atlantic Terrace property in December 2017. The energy produced by 548 kW of this installation is being provided to 144 income-qualified households in the District through no-cost community solar subscriptions.

Solar United Neighbors of D.C, (Community Power Network), has begun installing solar energy systems on single family rooftops in the District. In Q1FY19, they completed installation and approvals of 4 systems, and have an additional 45 homeowners under contract. These homeowners will own the solar installation from day one and should see their electric bills cut in half. Solar United Neighbors continues to recruit more households and is now seeing results from neighbor-to-neighbor referrals.

Urban Ingenuity has interconnected 1,401kW of new solar across 14 affordable housing properties in the District. Of the 1,401kW installed, 779kW (or 55%) will be dedicated to Solar for All clients.

Community Preservation Development Corporation started installation in December 2018 on Oxford Manor (414kW), the largest of its 5-project portfolio. Planning for resident engagement is currently underway.

Groundswell has completed site control on all 4 of their solar projects with enough capacity to meet the original 366kW goal. They have also filled their subscriber pool of 122 eligible households. Project construction on the Dupont Park Seventh-Day Adventist Church rooftop solar photovoltaic system (43kW) located on Massachusetts Ave. SE is expected to begin construction in the coming weeks. The Dupont Park Seventh-Day Adventist Church canopy solar PV project site located on Alabama Ave. SE is awaiting zoning permit approval with DCRA.

Ethos has an 192kW rooftop PV system at Minnesota Gardens under contract, a 515kW project at Dupont Commons under site control, and a pipeline of projects to fill out the remaining 1 MW at affordable housing Hampstead Properties sites (Valencia 46.8kW, Viscaya 53.6 kW, Homestead 95.4kW, Kingston 37.1kW). Ethos also held a project kick-off community engagement activity in December 2018 for their project at the Dupont Commons property. The team is moving toward Dupont Commons project installation within the coming weeks.

New Partners has begun construction of 470kW of solar energy on commercial downtown rooftops, making progress towards the total goal of 1,280 kW of photovoltaic capacity. In addition, in the first quarter of FY19, New Partners signed license agreements for three rooftops and continues to work with the District government and WMATA to secure additional rooftop space. New Partners is working with DGS to finalize a license agreement to begin construction at a DCPS school, and is working with WMATA to advance through the permitting process. In addition, New Partners is in the design phase for a solar facility on a WMATA metro station parking garage. This project will include innovative uses of the rooftop space, including wall-mounted panels, panels on a green roof, and canopies over a playground. The remainder of the solar systems will be installed in the second and third quarters of fiscal year 2019. New Partners is on track to serve at least 425 low-income households.

Challenges and Solutions

The Solar for All Innovation and Expansion grants and partnerships have made good progress towards construction and installation of the solar energy systems. The grantees continue to identify barriers and challenges as they progress through the implementation process. As challenges are identified, DOEE is working closely with stakeholders to facilitate solutions wherever possible.

Zoning, permitting, and approvals from Pepco and other agencies have proven to be challenging and have caused timeline delays, particularly for the ground-mounted and solar canopy projects and for rooftop projects proposed on historic buildings. The DOEE team has been closely involved in order to monitor progress and facilitate expedited review if possible. DOEE is working with grantees and partners to identify innovative methods to provide benefits to low-income households equivalent to a 50% reduction in energy bills where directly applying benefits on energy bills is not practical or possible.

					Data	as of 12.31.18

Notes:

FY19 numbers are not final and may change until the District's CAFR is released.

Expenditures do not include AY 18 negative expenditure and encumbrance of \$7,000,000 posted as an accrual for payment to the Green Bank in FY 19 once the bank is established.

Attachment 8 – REDF Monthly Actual Expenditures by Program As of December 31, 2018

				Actual Expenditures			
Agency	Project						Total
Fund	Number	Project Title	BUDGET	October	November	December	Expenditures
