

PERMEABLE SURFACE REBATE PROGRAM

Contractor List

This list contains contractors familiar with the Permeable Surface Rebate Program requirements and process. If you'd like to use a contractor that is not on this list, please contact the Alliance for the Chesapeake Bay to ensure that the contractor has all necessary documents for participation in this program. We recommend that you seek at least three different quotes before making a decision about which contractor to use. Please note that any contractor is eligible to remove impermeable surface through this program, but only those with the PICP Record of Completion are eligible to install permeable pavers.
