### Design Start/End
- n/a

### Construction Start/End
- March 2017 – September 2017

### Objective

Restore the reach of stream flowing through Alger Park as part of a larger project to improve water quality, reduce stormwater volume, stabilize the stream and improve habitat conditions, in tandem with related subwatershed stormwater management efforts.

**Outputs**

- Restoration of 1,560 linear feet of streambank and associated habitats
- Stabilization and revegetation of five acres of sloped uplands and riparian forest
- Reductions in nutrients and total suspended solids

### Sewershed
- MS4

### Watershed
- Anacostia River

### Subwatershed
- Texas Avenue Tributary

### Ward
- 7

### Stormwater Treatment Volume
