Stormwater Management Plan

Most residential sites do not have a
Stormwater Management Plan.

Has an engineer prepared a Stormwater Management Plan (SWMP) for your site?

A SWMP is only required for development sites with a stormwater management requirement as part of a building permit.

If there is a SWMP, proceed to slide 4. If there is no SWMP, proceed to slide 5.

You are entering a new site into the Stormwater Database. Please follow these steps:

1. If the site does not have a street address, please change the "Address Format" to Block, Intersection, or Nearest Address. Then, skip to step 3.
2. If the site has a street address, enter the address into the field "Input Address" and then click "Get Address Details." Wait 10 seconds to allow the Stormwater Database to check the Master Address Repository for site information and fill out the form.
3. If the site is a block or intersection, or if the MAR could not find the site, complete the rest of the information in the "Site Information" section of the form.
4. Click "Save"

This page uses the term best management practice (BMP) instead of green infrastructure. Enter the installation date, BMP Group, BMP type, and attach a photo of the BMP.

Entering a BMP Name is optional.

BMP Group options:

Green Roof

Rainwater Harvesting: Includes rain barrels, cisterns, and similar practices

Impervious Surface Disconnection: Includes downspouts that drain into a landscaped or pervious area. If the application includes an impervious surface disconnection, please attach site diagram to the application.

Permeable Pavement

Bioretention: Includes rain gardens

Infiltration

Open Channel Systems

Ponds

Wetlands

Proprietary Practices

Tree Planting: Trees must be planted after May 1, 2009 to qualify. Enter the tree species as the *BMP Name*. Enter each tree species as a separate BMP, but multiple trees of the same species can be entered as a single BMP. DDOE will verify that each tree species has an average mature spread of at least 35 feet.
