

Attachment 2 - Regular Benefits
DOEE's LIHEAP Regular Benefits Table for FY 2019
See below for explanation

Explanation Key: How to use this table

Use this table to determine how much of a LIHEAP benefit a household may receive for this fiscal year.

Step 1: Before you start working through the table, you must see if the household is eligible for a LIHEAP benefit. That will depend on the size of the household and the combined income of its members.
A household is people who live together. It may be one person, a family, or another group who share the home.

Income Limits for FY 2019

| | | | |
|----------|----------|----------|----------|
| 1 person | \$30,918 | 5 people | \$68,970 |
| 2 people | \$40,431 | 6 people | \$78,483 |
| 3 people | \$49,944 | 7 people | \$80,267 |
| 4 people | \$59,457 | 8 people | \$82,051 |

IF the household income is less than the income limit for the persons, go to step 2. IF NOT, the household is ineligible.

Step 2: Next, is your house a "single family" home (SF) or "multifamily" (MF)? Multifamily usually means apartments.
Go to the section that lists the "Home Type" group for you -- SF or MF.

Step 3: Now, find the "Income Household's" line for the number of "People" in your home.
This is the number on the table that is just lower than your combined household income.
Example: If you are in an apartment with 4 people, and your annual income is \$4100, you would go the line that says MF 4000 4.

Step 4: Find the home heating source for your home. That tells you the maximum benefit for you.
Example of a household living in a multifamily building, with an income of \$4,000, four people in the household, and a gas heated home. The maximum benefit is \$1350, which may be applied to the electric bill.
The oil benefit is never more than \$1500. But, you can instruct DOEE to pay the utility company that supplies cooking electricity or gas.

Example of a household living in a multifamily building, with an income of \$4,000, four people in the household, and an oil heated home. MF 4000 4: Instead of paying the oil company, you can have DOEE pay a maximum of \$1,471 electric or \$883 gas.
If your utilities are included in your rent, so that Heat is In Rent (HIR), the benefit can never be more than \$250, paid directly to your utility company for your electric or gas used for cooking or light, etc. DOEE pays the utility company directly.

Note: For households with greater than four people, use the benefit line for "4" people.
(This table continues on the next page.)
