

STORMWATER RETROFIT PROJECT

AMIDON PARK

THURSDAY, DECEMBER 6, 2018 AT 6:00 PM

DCRA, 1100 4TH STREET SW, ROOM E200, WASHINGTON, DC 20024

The Amidon Park project area is located along G Street, SW between 4th Street SW and 6th Street SW. Through this project DOEE will add stormwater management to the site with the intent to maximize the amount of stormwater that can be treated for the funding available (project goal is to capture the 1.2-inch rain event or greater). Care will be taken to avoid impact to the existing established trees located on the site. This project entails the use of subsoiling application to reduce soil compaction and increase infiltration of stormwater on approximately 1.2 acres of athletic field.

The stormwater retrofits to be installed as a part of this project are funded through the DOEE Stormwater Enterprise Fund and U.S. Environmental Protection Agency (EPA) Clean Water State Revolving Fund (CWSRF). The goal of this project is to improve water quality in the Anacostia and Potomac Rivers for the benefit of District residents, visitors, wildlife, and the environment, while providing high quality outdoor recreational space and facilities for children and adults to learn, play, and connect with nature. A further goal of the project is to reduce the stormwater pollutants that enter local waters (e.g., rivers, streams, estuaries) as required under the current applicable EPA National Pollutant Discharge Elimination System (NPDES) permit for the District's municipal separate storm sewer system (MS4).
